

RELEASE TO PERFORM DESTRUCTIVE TESTING

Destructive testing includes, but is not limited to disassembly. Partial destruction of brass fittings will need to be performed in order to complete metallurgical testing. Tubing, press sleeves or crimp rings, will need to be removed from fittings in order to inspect the insert branches of the fittings. Manablocs will need to be disassembled in order to perform internal and microscopic inspections. Tubing may be cut into pieces in order to perform dimensional measurements. Press fittings will be cut apart in order to inspect sealing elements, internal components, and pipe surface. Samples returned for evaluation will not be able to be returned in the same exact condition as received by RIIFO.

I, _____, hereby release and give permission to RIIFO to
(Please print name)

perform destructive testing. This release also includes any other third party, who at the request of RIIFO is performing testing in order to aid in the determination of cause of failure.
